

**OSCAR** is an easy-to-use dashboard software system that provides non-medically trained health workers with the evidence-based clinical support they need to improve the health of individuals in their community.

Empower CHW workforce to:

- Provide individualized health recommendations via evidence-based decision support
- Identify trends in health factors (such as blood pressure levels) and health behaviors (such as nutrition and physical activity)
- Manage health goals of participants
- Focus on developing rapport with participants
- Connect participants with local health resources
- Store and manage participant health information
- Manage their tasks, notifications and participant interactions

Allow program administrators to:

- Maximize reach, retention and impact of programs
- Demonstrate program impact to community members and funders
- Efficiently collect and utilize data for analysis of outcomes and program improvement.
- Promote participant engagement and retention
- Ensure fidelity to the program
